PROFESSIONAL SUMMARY

Entry-level Computer Science professional with hands-on academic project experience in web development, Python programming, database management, and software development. Familiar with HTML5, CSS3, JavaScript, Python, Flask, and SQL. Developed projects involving carbon footprint tracking, cafe order management, and piezoelectric energy generation. Seeking an entry-level Software Developer or Java Developer role to apply technical skills and contribute to software development projects.

TECHNICAL SKILLS

Programming Languages: Java, Python(Basics)

Web Technologies: HTML5, CSS3

Frameworks and Libraries: Flask, Chart.js

Databases: SQL

Developer Tools: Visual Studio Code

Core Concepts: Data Structures, Arrays, Strings, Loops, Basic Database Management

PROJECTS

SmartCarbon – AI-Driven Carbon Footprint Tracking

Technologies: HTML, CSS, JavaScript, Python, Flask, Chart.js, MySQL/SQLite

- Developed a web application to help users track daily activities and estimate their carbon footprint.
- Implemented carbon emission calculations for activities such as travel, electricity consumption, and food choices.
- Built user interface components for displaying carbon footprint reports and visualizations.
- Worked on data storage, report generation, and suggestions for reducing environmental impact.

Quick Brew Cafe – Cafe Management System

Technologies: HTML, CSS, JavaScript, Python, Flask, MySQL/SQLite

- Developed a web-based cafe management application for browsing menu items and placing orders.
- Implemented menu display, order placement, and order management functionality.
- Worked on frontend development, backend integration, and database handling.
- Designed the application to simplify the customer ordering process.

Stone to Spark – Piezoelectric Energy Generation

Technologies/Components: Piezoelectric Sensors, Rectifier Circuit, Capacitor/Battery, Voltage Regulator, LEDs, Wires

- Developed an academic project exploring the conversion of mechanical pressure or vibrations into electrical energy.
- Assembled the circuit using piezoelectric sensors and supporting electronic components.
- Connected sensors and circuit components to demonstrate energy conversion.
- Explored the potential application of piezoelectric energy harvesting in small-scale devices.

EDUCATION

Bachelor of Technology (B.Tech.) – Computer Science and Design

St. Peter's Engineering College | 2022–2026 | CGPA: 9.24/10

Intermediate – Board of Intermediate Education

Sri Chaitanya Junior College | 2020–2022 | CGPA: 9.5

Secondary School Certificate (SSC)

NSKK High School | 2020 | CGPA: 10/10

CERTIFICATIONS

- TCS National Qualifier Test (NQT) – 2025; reported score: 60%
- ServiceNow Certified System Administrator – June 2024
- ServiceNow Certified Application Developer – March 2026
- Certified System Administrator Maintenance Exam Delta – April 2026
- Python Programming – Udemy, March 2024
- Google Cloud Computing Foundations – March 2024
- ICAT Academic Aptitude Test Certification – June 2024
- Overview of Global Navigation Satellite System – ISRO

ACTIVITIES AND ADDITIONAL LEARNING

- Participated in a coding event at Narasimha Reddy College of Engineering – January 2024.
- Participated in a Black Box hackathon – March 2024.
- Attended webinars on Artificial Intelligence – January 2023.
